Cool Creations...

The Tribe- ‘Electric Trike’ Riders are supposed to stand up while on the Electric Trike, an interesting cross between a longboard and the average two-wheeler.

You have to stand on the bike not sit on it. You have Riders who are supposed to stand up while on the Electric Trike, making it move.
Q: What do you call a fake noodle?
A: An Impasta

BMX bikes first broke onto the scene in the early sixties. Schwinn was accredited for making the first BMX style bike which was called a Sting Ray. The first BMX race took place in California in 1971.

There are 3 basic types of BMX bikes. They are jump/dirt bikes, racing bikes and freestyle/stunt bikes.

BMX BIKES

Once there were two friends at school. They were both girls. Their names were Isabella and Maddie. They were just like sisters. One day a carnival came to the school and Maddie and Isabella were in the crowd. Maddie was chosen to be an assistant and went behind the BIG trailer. She got some things ready for the show. The BOSS of the show said to Maddie “Wait here”. She was waiting for hours. She was in a spot where the boss of the show couldn’t see her. The boss came back and was thinking that she went back to her class but his thinking was wrong and she didn’t hear him walk in. Suddenly she heard an engine running. She was saying in her head ‘what happened?’

She was terrified but she had the benefit of the doubt. She had her phone, but her phone was out of charge. Meanwhile Isabella was freaking out wondering where Maddie was. She was scared. She didn’t know what to say to her parents. She told the school and came to the rescue. They quickly got on the phone and Isabella was returned safely.
